

Hamilton Aquatics Competitions

Entry Guide

Entering a swimming competition can be a confusing experience. There are many things to consider such as which competition, which events and how many events to enter, there are entry times, consideration times, cut off times and the closing date, which comes around all too quickly.

This guide will hopefully answer some of the most frequently asked questions and make the process of entering competitions less confusing.

Key Terms

- **Age on Day:** This is usually the last day of the event or championships as specified in the entry pack. This will determine your age group for the competition.
- **Closing Date*:** The closing date for the competition will be clearly stated on the Hamilton Aquatics website at [Hamilton Aquatics Dubai Competitions Page](#) in the competition entry pack. If your entry is not received before the closing date, you will not be allowed to enter.

**For Hamilton Aquatics Swimmers, please note that closing date of the competition and the closing date of Hamilton Aquatics Entries team are different. Read all emails from Hamilton Aquatics Entries Team and check with your squad coach. Your entry will not be accepted if it is submitted late.*

- **Qualifying Times*:** A qualifying time is a time you **must** be faster than to be able to enter the competition. Entry times in qualifying times will be **guaranteed entry**. You will have to prove that you have achieved this time when entering.

** For Hamilton Aquatics Swimmers, Hamilton Aquatics Entries Team will only use times that are recorded in the team database. If you are new to Hamilton Aquatics, you must submit your best times to be added to the database, before you enter a competition. Speak to your squad coach for how this should be done.*

- **Consideration Times:** A consideration time is a time you **must** be faster than. Entry times in consideration times **may be considered** to enter the competition and **does not** guarantee entry. In the event of oversubscription, we will reject entries from slowest to fastest regardless of age groups.
- **Cut off Time (Not faster than times):** You cannot enter if you are faster than the cut off time.
- **Speed Limit:** A competitor who swims faster than a speed limit time will not be eligible for medals or other awards in that event. By swimming faster than a speed limit time it is an indication that a competitor should be competing in a higher-level competition. For Hamilton Aquatics First Series, swimmers who swim faster than a speed limit will receive a speeding ticket for their achievement.
- **Eligibility Report:** A list of the events that a swimmer can enter for each competition.

- **Proof of Time:** Proof of time is evidence of where a time was achieved. All entries for Hamilton Aquatics Competitions **must** now be accompanied by proof of time. It is the responsibility of clubs and coaches to provide proof of time which must be achieved in a competition licensed or ratified within the country it is held or with publicly available results that can easily be referenced to establish the proof of time. A proof of time report must be submitted with all entries. Failure to do so may result in all entries being rejected.

Times achieved in time trials, recorded by coaches during a training session or achieved in school gala's where no electronic timing is used, cannot be used for entry and will not be accepted. Swimmers whose times cannot be proven will be rejected.

Teams holding internal competitions such as club championships or dual meets should publish the meet entry criteria and the official results on their website so that they are publicly available. Results should be recorded with individual timekeepers on each lane and in the presence of at least one qualified official. Preferably results will be recorded in meet management software such as Hy-tek Meet Manager.

Proof of time can be produced in Hy-tek via the reports section as follows:

From the Main Menu select > Reports > Meet reports > Meet Entries > Check the 'include proof of time' box and save the report.

Below is a sample proof of time done in Hy-tek:
